

Prefabricated single components

GET EASY ALU COMPONENTS DELIVERED CUT, DRILLED AND/OR POWDER-COATED TO YOUR EXACT SPECIFICATIONS.

Fill out your project details and send them to us by email: sales.us@q-railing.com or sales.ny@q-railing.com. We will calculate what exact products you need, how many and with what cut and drill details. So no need for you to give us any dimensions or measurements. We will then provide you with a quote for all prefabricated components. On your approval, we will start the prefabrication. We will cut, drill and/or powder-coat everything to your exact specifications and supply you with the prefabricated components.

All you need to do:
Assemble ready-to-install Easy Alu modules from the components and take them to the construction site. There, you will attach the modules to the floor and join them together with a handrail. That is it!

For what type of project do you need the balustrade?*

- Private/Residential use
- Commercial/Public use

What floor surface will you install on?

- Concrete
- Other:

*Do remember to take into account all guidelines and restrictions specified by the building codes that apply to your country and/or region.

Your project

- 1** Give us the measurements of the balcony floor that you want to install on.
- 2** Draw a top view of the balustrade that you require (no need to give us the balustrade measurements, as we will calculate those based on the floor measurements).
- 3** Mark any points where the balustrade should connect to a wall with a large dot (as shown in the examples).
